

# Contingency plan

---

We have systematically built up a contingency plan to assist us in our daily survey work. The plan includes detailed information and vital data regarding:

- Shipyards - / dry docks
- Salvage companies
- Tug owners
- Engine manufacturers
- Gearbox -, propeller- and other manufacturers of marine equipment
- Specialist companies including tailshaft- and rudderstock straightening, grinding of crankshafts, metallocking of engine parts etc.
- Specifications made to suit in case of fire-, submerging-, engine- and hull damages etc.
- Detailed records of previous projects
- Repair costs at different locations/ports
